

SUNNY WATER SPORTS PRODUCTS PVT LTD

Total solutions in Water Tourism

Est: 1992

Certified by:

SUNNY WATER SPORTS PRODUCTS PVT LTD as the very name indicates, started the production of Water Sports Equipments such as Rowing Boats (Pioneers in India), different models of Kayaks, Canoes, Canoe Polo etc- all in FRP – in the year 1992 at Pune , Maharashtra State , INDIA. We are having more than 28 years of experience in this field.

Now the company owns the skill and technical know-how to manufacture more than 130 types of products under one roof, which nobody in the world can claim or boast of. Our range of products include from Single-man Kayak to 150men capacity **Luxury Double Decker Tourist Sea-going Boat**. We are also manufacturing **Catamaran type boats** which are widely used all over the world ranging from 20 seater to 150 seater capacity. We are the major players in India in Water Sports, Tourism and Adventure Sports sectors and nobody can ignore our presence in the field of disaster management also.

All our indigenous products – Kayaks, Canoes (both Racing and Recreation models), Rowing Boats, Canoe Polo, Pedal Boats, Catamaran Moveable Floating Jetties, Eco-friendly Electric Boats-battery run (first time in India), **Luxury Tourist Double Decker Boats** from 25 to 150men capacity , Traditional Kerala House Boats in Fibreglass, Eco-friendly Electric “River Bus” (a new concept and pioneered by us), Inflatable Boats, Rigid Inflatable boats, Swamp (Air) Boats (again pioneers), River Cleaning Boat (Pioneers) Rescue Boats, FRP Flat Bottom Boats, Water Scooters, FRP Shikarra , Small Fishing Boats, Floating Jetties, Life Jackets, Life Buoys etc.are manufactured under stringent quality control supervision, adopting to the latest international technology and composites. We are using the latest available composites such as Balsa Core / PVC Core sandwich construction with Isophthalic Marine grade Resin/Epoxy with Vacuum Resin System with an eye to reduce the weight of the products which will have direct impact on lesser fuel consumption,high speed,more strength,more rigidity,added stiffness,low maintenance cost.

We are proud to state that our boats are selected for conducting the National Games and Championships held for Rowing and Kayaking in India from 1994 onwards. The raw materials / accessories used in the above Boats are of the superior quality and almost major parts of the accessories used are imported ones.

Our prestigious clients are Telangana State Tourism Development Corporation, Andhra Pradesh Tourism, IWT Assam, Jungle Safari Raipur, Sports Authority of India, Meghalaya Tourism Development Corporation Ltd, Water Resources Departments, Tourism Departments of various States, Indian Army, Indian Navy, the Research and Development Establishment of the Army, various colleges and private Boat Clubs and Water Sports Centre's all over the country. Besides, we believe in social cause. We, without expecting any remuneration, run Water Sports Centre's in India to train the children in Rowing, Kayaking and Canoeing in search of new talents and thereby to promote Water Sports in India.

PEDAL BOATS

This boat is very popular among tourist sectors as it gives the tourists the feel of pedaling in water. The boats are made of FRP material and are provided with ergonomically designed bucket seats, 2, 4 or 6 Nos. A retractable/ foldable canopy shall be provided to give necessary protection to the occupants from sun & rain. The pedal boat would have the feel of water car when fitted with steering. Pedalling system is available for 2, 4 and 6 people.

We have 12 models of pedal boat available with us. Some of them are listed below:

- Star 2 seater
- Star 4 seater
- Star 6 seater
- Duck 2 seater
- Duck 4 seater
- Fish 2 seater
- Frog 2 seater
- Dragon 6 seater

SPEED BOAT 4 SEATER

FRP Speed boats are manufactured from Marine grade FRP, with suitably contoured 'V' shaped hull to obtain high speed even in rough and choppy water. This boat can also be used for rescue purpose.

Length O.A : 4.80 mtr.

Overall beam : 1.70 mtr.

Draught (Loaded) : 0.35mtr

Hull : Contoured 'V' Type

Capacity : 4 persons

Engine for Normal Speed: 25HP Outboard engine with remote control steering system

Engine for High Speed : 40HP Outboard engine with remote control steering system

Construction : UV self pigmented marine Grade Isophthalic Gel coat, Marin Grade Isophthalic resin, Additional Layers at Keel, Chine and transom. Sandwich construction with PVC core vacuum infusion System. Fittings with sun and wind guard.

Canopy : Available with FRP / Foldable PVC Cloth

Approval : IRS (Indian Register of Shipping) approved

SPEED BOAT 6 SEATER

FRP Speed boats are ideally best suited for Tourism Departments and for River navigation and is specially designed and developed to enjoy the adventure sports and for Rescue operations as well. The Boats are fitted with Remote Control Steering system and forward reverse in front of the Boat to control the OBM.

Length O.A : 5.30 mtr.
Overall beam : 1.70 mtr.
Draught (Loaded) : 0.35mtr
Hull : Contoured 'V''Type
Capacity : 6 persons
Engine for Normal Speed : 25HP Outboard engine with remote control steering system
Engine for High Speed : 40HP Outboard engine with remote control steering system
Construction : UV self pigmented marine Grade Isophthalic Gel coat, Marin Grade Isophthalic resin, Additional Layers at Keel, Chine and transom. Sandwich construction with PVC core vacuum infusion System.Fittings with sun and wind guard.
Approval : IRS (Indian Register of Shipping) approved

FLAT BOTTOM BOAT 14 / 20 SEATER

This is a multi-purpose boat. It is having a wide bottom and it can run in minimum level of water. It can be propelled either with an OutBoard Motor or manually with wooden oars. The boat is so stable and safe and is made out of Fibreglass materials. It is so ideal for rescue operations and it can reach any nook and corner of the affected area during the floods.

Length O.A : 14ft / 17ft

Width : 7.3 ft

Height : 1.1 ft

Weight : Approx 200 kgs

Capacity : 14 persons bench seats / 20 persons bench seats

Engine : 15hp Outboard Engine

Construction : UV self pigmented marine Grade Isophthalic Gel coat, Marin Grade Isophthalic resin, Additional Layers at Keel, Chine and transom. Sandwich construction with PVC core vacuum infusion System.

Canopy : FRP Canopy

Valuable Customers:

ECO-FRIENDLY ELECTRIC BOAT

We have successfully designed, developed and manufactured the electric powered eco-friendly boat in our company. The electric boats are noiseless, vibration free and do not pollute the environment. Fitted with rechargeable batteries, these boats can run for 6-8 hours on one single charge. Eco- Tourism focuses on enjoyment of nature without destroying it, hence the electric boats are becoming very popular in eco-tourism.

This type of boat would be most suitable for using in bird and wildlife sanctuaries for sightseeing without disturbing the animals and the birds, especially in clean lakes where use of Outboard Motors / Inboard Diesel Engines are prohibited. The boats being made of Fibre Glass, it does have a very long life.

Length O.A	: 3.90 mtrs
Breadth	: 01.66 mtrs
Height	: 0.70 mtr
Battery	: 1 set (2 nos) battery
Volts	: 12 volts
Charges	: 01 No
Capacity	: 6-8 seater
Construction	: UV self pigmented marine Grade Isophthalic Gel coat, Marin Grade Isophthalic resin, Additional Layers at Keel, Chine and transom. Sandwich construction with PVC core vacuum infusion System.

RIGID INFLATABLE BOAT

Manufactured out of marine grade Fibreglass and suitably complemented by high density rubberized (HYPALON) fabric, the boat is extremely stable and safe.

As the name suggests, this boat is a combination of fibreglass and an inflatable collar around the upper part of fibre portion. It has got high speed due to its 'V' shaped fibreglass hull. The inflatable skirt all around the boat provides safety to the people and prevents injury to the person in the water as well.

The FRP hull is filled with P.U. foam and thus unsinkable. The buoyancy chamber of the inflated rubber collar has five independent chambers so that in case of accident and damage to two or three chambers, the boat will still be serviceable with full load. The Hypalon material Polyimide fabrics coated is imported from Pennel & Flipo.

Length O.A : 3.80 mtr / 4.70 mtr / 5.40 mtr

Breadth : 1.60 mtr / 2.10 mtr / 2.30 mtr

No of Chambers : 3 Nos / 5 Nos / 5 Nos

Buoyancy diameter : 0.35 mtr / 0.50 mtr / 0.50 mtr

Hull Construction : Fibreglass, U.V. resistance Gelcoat, Epoxy resin with vacuum infusion system and sandwich core material

Recommended Engine : 40hp Outboard Engine and above

Collar : The inflatable collar will conform to the highest military specifications for heavy duty use. It will be made from the best imported Hypalon material Polyimide fabrics coated with Neoprene & Hypalon - ORCA® 866 Make, Pennel & Flipo, Belgium

KERALA TRADITIONAL HOUSE BOAT

We have launched a new technology for building house boats which is a unique design so as to transport to anywhere around the world. The technology is patented and is designed to enjoy particularly for family and for corporate meetings.

Length O.A : 19.00 mtrs (1BHK)

Length O.A : 25.00 mtrs (2BHK)

Length O.A : 30.00 mtrs (3BHK)

Breadth : 05.00M

Depth : 1.50 M

Design : FRP Catamaran hull capable of operating at sea shore and Inland water. Construction can be done in presence of IRS/Under IV act rule
Specification : AC Luxurious Bedroom, kitchen, and sit out area.

Structure : Super Structure will be done with traditional houseboat manufacturing equipments and other items will be of superior quality.

Accessories : TV, Fridge, AC, 10KVA Genset.

Engine : Ashok Leyland engine

Construction : UV self pigmented marine Grade Isophthalic Gel coat, Marin Grade Isophthalic resin, Additional Layers at Keel, Chine and transom. Sandwich construction with PVC core vacuum infusion System.

SWAMP (AIR) BOAT

Also available in Aluminium Hull

Swamp (Air) Boat can be effectively employed in Wild Life sanctuaries, Crocodile dominated areas, Dolphin dominated areas, Creek areas (e.g. Kutch, Gujarat) etc. It is ideal for adventure savvy tourists who like to go to interior creeks and marshy lands. Swamp boat is a watercraft, which has an air propulsion system, i.e., it has a propeller which pushes air to the rear and provides the thrust to drive the craft forward. Since no part of the propulsion system is underwater, the airboat can be operated easily in water with lesser depth.

Ideal environment for the Swamp is shallow, weed choked, hyacinth infested rivers, lakes and swamps that restrict movement of conventional boats because their underwater propellers get entangled and damaged, due to the undergrowth.

Length O.A : 5.00 mtr.

Breadth : 2.50 mtr.

Height : 1.90 mtr

Hull : Contoured 'V' Type

Capacity : 10 persons

Propeller : 2.50 mtr. dia, with laminated wood, two blade

Construction : UV self pigmented marine Grade Isophthalic Gel coat, Marin Grade Isophthalic resin, Additional Layers at Keel, Chine and transom. Sandwich construction with PVC core vacuum infusion System.

It is various famous in tourist sectors.

ALUMINIUM TRIPLE PONTON

A tritoon is a triple-hull pontoon boat. Instead of having two large aluminum tubes beneath the deck, a tritoon has a third tube in the center that distributes weight even more evenly over the water. This added stability and structure also means the boat can handle more horsepower than a typical double-hull pontoon boat.

Length : 9 metre
Width : 2.50 metre
Capacity : 20-25 persons
Pontoon : Three

Material Construction : Marine aluminum. Every part of aluminum boat is marine grade, Corrosion resistance.

Accessories Included : Water proof Captain seat, Fiberglass Steering console, Water proof Fold canopy, Waterproof Sofa seat, Marine deck/floor, 12V40A Battery, Compass, 12V cigar lighter, SS Ladder, Bow sides Right/left light, Port light

Valuable Customers:

FRP FLOATING JETTY

We have developed our own floating dock system with Fibreglass and this is an integral part of infrastructure to be installed by any sports centre for the protection of boats. This is also essential for embarking and disembarking to / from boats. The jetties are attached to the banks of water bodies and the boats can be tied up with jetty. It also prevents boats from dashing to the banks of the water body and thus can prevent damages caused thereby.

Length : 8 fts
Width : 6.5 fts
Height : 18 inches
Buoyancy : 2000 kgs

Material Construction : The Floating Jetty consists of panels made out of Fibre Reinforced Plastic (FRP) with internal honey comb structure with vacuum infusion resin system and a deck formed of chequered anti skid plate to prevent accidents from slipping.

Main Features : Modular Construction, Easy/Fast installation/Anti-skid surface/U V Protected/More stable/Excellent Buoyancy

Minimum maintenance : Unbelievable durability/PVC Pipe Fender all around the module/
Connectors: SS Plate, Nut and bolts.

Railings MS Railings PU Coated with nut and bolts

Valuable Customers:

FLOATING CUBES

LLDPE - Linear low-density polyethylene is easily Available in Indian Market. Its more flexible, due to its flexibility it confirms well to a variety of surfaces. LLDPE is used for a tremendous amount of strength to absorb impacts.

The specifications of HDPE Blocks are as under:
REENETHENE G-9641U is a Hexene Co-polymer based Linear Low Density Polyethylene Resin (LLDPE) in powder form which is designed for Rotational molding applications, additivated with antioxidants and UV stabilizers. Items produced by GREENETHENE G-9641U have an excellent stiffness

Size : 500mm X 500mm X 400mm
Weight : 7.600 kgs

HDPE Docks - High-density polyethylene which are modular in nature and also have extralong life upto 15 years. The 3D Design makes the Docks interlocking in nature. These HDPE buoys are Cubical in shape and modular in nature that enable easy assembly and dismantling. Being modular in nature, they can be easily arranged to form a Floating Jetty / Platform of any Size (each)!

The specifications of HDPE Blocks are as under:

Dimension	: 50cm × 50cm × 40cm L x W x H
Weight	: 7.0Kgs/ pc ± 0.3Kgs/ pc
Load Capacity	: 350Kgs/ m2
Raw Material	: High Molecular Weight (HMW) HDPE.
